Principle of disinfection

Principle of disinfection

High-energy ultraviolet rays with a wavelength of 200-280nm can destroy the molecular structure of DNA (deoxyribonucleic acid) or RNA (ribonucleic acid) in microbial cells, causing growth cell death and (or) regenerative cell death, achieving disinfection effect.

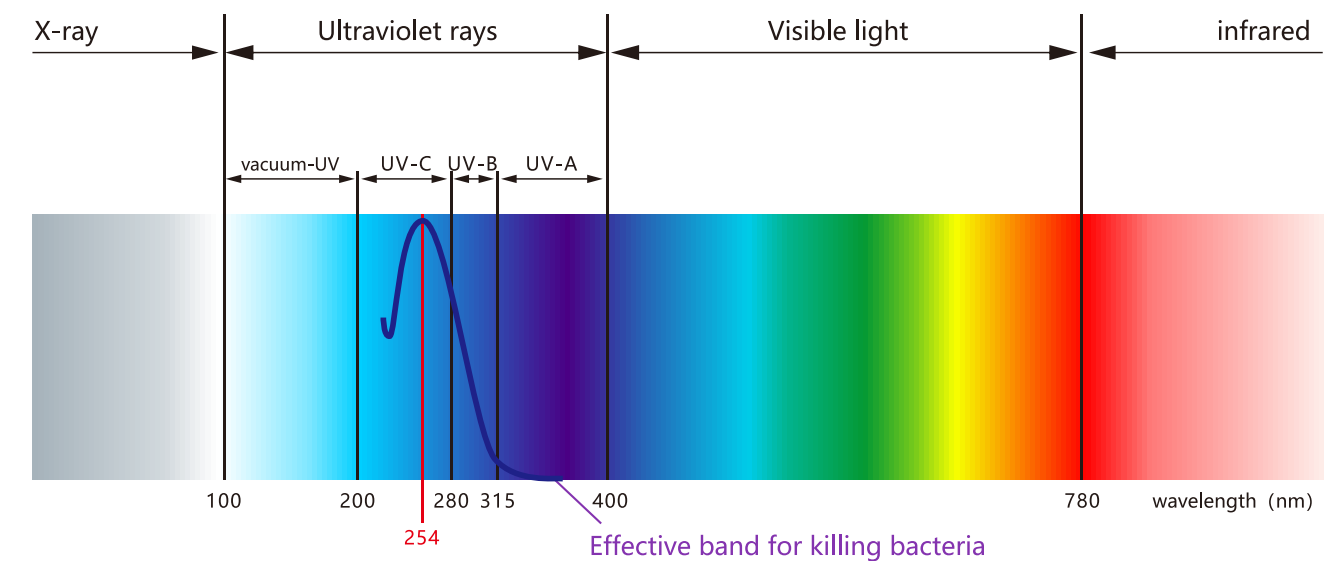

Bacterial structure: DNA + cell membrane

Virus structure: RNA + protein shell

GK Microbiology laboratory test results show that microorganisms can be killed by more than 99.9% after being irradiated with a certain dose of UV-C ultraviolet rays.

GK's UV-C ultraviolet lamp emits ultraviolet light with a wavelength of 254 nanometers. This wavelength can effectively destroy the DNA and RNA in the cells of the microorganisms and achieve the effect of inhibiting bacteria.

Surface UV-C Product

High-Efficacy Disinfection

Test verified, 99.9% bacteria is disinfected when 1 meter away from the U12-80W UV-C disinfection tube light, 1 minute disinfect 4.57 square meters.

Advantage

- 1, Remote control with 18s delay start-up, built-in microwave sensor+PIR sensor, much safer.
- 2, Mirror Aluminum increase Ultraviolet disinfection intensity.
- 3, High strength steel Protection.
- 4, With CE RoHS FCC ETL FDA EPA certifications and SGS disinfection test reports.

U12 Integrated intelligent ultraviolet disinfection tube light

Disinfection Light Mounted on the ceiling, The enclosed space is disinfected by UV-C ultraviolet in all directions when unoccupied
Applicable to school, restaurant, supermarket, office and public area.

40W/60W/80W

- Multi-function junction box
- Wireless remote control
- Ozone-free UV-C
- quartz glass tube

Internal Intelligent Sensor

- 1, Intelligent Design: 10s count down with buzzy sound before tube lamp light up If movement detected by microwave sensor within 10s, UV-C tube lamp will stop working.
- 2, Intelligent Sensor Design: UV-C tube lamp will stop working if someone enters the disinfection area when tube lamp is on.

Advantage

- 1, Internal 1 Microwave sensor.
- 2, Loosen the screw and rotate the pin angle.
- 3, Mirror Aluminum increase UV-C disinfection intensity.

Model	Voltage	Wattage	Wave length	Irradiation Intensity (1M away from tube)	UV retention rate	Working	Working Temp	Diameter (mm)	Dimension (mm)	Base	Life Span (hour)
U18-20W-01 U18-20W-02	100-120V 50/60Hz 220-240V 50/60Hz	20W	254nm	≥110μw/cm²	≥75%	360mA	0°C~35°C	35	589	G13	6,000

U18 T8 UV-C tube light with microwave sensor

Internal ballast, Plug and play with easy replacement of traditional lamps;
10s delay switch on; Intelligent human detecting protection device.
Applicable to medical center, home living, office and public area.

20W/30W/40W

quartz glass tube

10s delay operation

Ozone-free UV-C

Portable Design

Lightweight design | Lift with one hand | Maximum 80W | High wattage with wider disinfection area | More disinfection applications when installed on the tripod stand.

Advantage

- 1, Internal 1 Microwave sensor and 3 PIR sensors, security protection device.
- 2, 360 degree disinfection, wireless remote control for on/off and time setting.

U10

360 Degree Intelligent UV-C Lamp

360 degree disinfection, 3D intelligent human detecting protection device. Applicable to medical treatment center, home living, offices and so on.

60W/80W

- quartz glass tube
- Wireless remote control
- 18S delay operation
- Ozone-free UV-C

L35

Movable disinfection trolley

UV-C Ultraviolet disinfection trolley, specially disinfect the microorganism on the surface of the object. The disinfection area can reach 30 square meters, with universal wheel can move freely, with brake can be fixed point placement. Applicable to medical treatment center, bank, offices, schools, hotels and public areas.

60W

Switch able to control on and off of single tube or double tube.

Mechanical timing
0-2 hours timing off

 Surface UV-C Product

0-180° multiple angle rotation movable

180° rotatable tube, with universal wheel can be moved freely without position restriction, to achieve multi-directional disinfection, clean every angles.

2 in 1 disinfection lighting

For disinfection and for lighting, the UV-C disinfection lamp control system is independently controlled from the LED lamp, the disinfection lamp or LED lamp can be switched on and off independently.

Advantage

- 1, UV-C security protection device, disinfection light turn off automatically when human being is detected.
- 2, Compatible with L32 safety system, double security protection.
- 3, Separated power control for LED and UV-C, much safer.

Optional Dimension :

- 1、595x595x57mm
- 2、603x603x57mm

U22

Hybrid UV-C disinfection LED troffer

Disinfection Light Mounted on the ceiling, total UV-C Ultraviolet disinfection in enclosure space when unoccupied.
Applicable to meeting room, school, restaurant, office and public area.

90W

Intelligent
Microwave sensor

18s delay turn on

Separated power control
for LED and UV-C much safer

Tube protection mesh
Protect from broken

Hybrid (Mercury+LED) Indirect UV-C Product

Air purification circulation system

Double sided fan inlet and outlet design, through the fan to quickly form air convection, accelerate the indoor air circulation, and quickly extinguish bacteria disinfection, improve the efficiency of disinfection, HEPA filters 99.7% of particles ≥ 0.3 microns.

Advantage

- 1, HEPA filters 99.7% of particles ≥ 0.3 microns.
- 2, Fan air convection speeds up air circulation.
- 3, The mirror surface aluminum increases the ultraviolet ray and the irradiation intensity.
- 4, With LED light 3 color temperature adjustment and dimming.
- 5, Enclosed UV-C Light Source, harmless for human.

U15 Air purification UV-C disinfection panel light

UV-C Hybrid Direct LED Linear. The host can inhale the polluted air, purify and disinfect, and then discharge it to achieve air disinfection. Suitable for medical, industrial, office, toilet, and other public places.

135W

 Memory power-off function
Perform settings before power off

 UV-C panel light
UV-C Hybrid Direct LED Linear

 LED light 3 color temperature
and dimming

 3-in-1 dimming
interface

Selectable Dimension:

- 1, 595x595x142.8mm
- 2, 603x603x142.8mm

Model	Power	Voltage	Wave length	Lamp type	Hold time	LED CCT	LED Lumen	Lamp size	Weight	Life span	Colour

U19

Upper Air UV-C Linear light

UV-C Hybrid Direct Led Linear.Ultraviolet rays illuminate the stratosphere to kill bacteria and viruses floating in the indoor air. It is suitable for medical treatment, industry, office, shopping mall, and other public places.

125W

 Upper room flat-beam UV-C disinfection
UV-C Hybrid Direct Led Linear

 Fan air convection
Speed up air circulation

 Double-sided smart sensor
Prevent UV-C from irradiating people

 Double-sided light design
Enhanced disinfection range

 Hybrid(Mercury+LED) Indirect UV-C Product

Double-sided upper room emits light flatly

The double-sided upper room flat emitting light design increases the disinfection range and enhances the disinfection efficiency. It is installed at a height of 2.3m or higher. UV-C ultraviolet rays will not irradiate the human body and achieve the coexistence of man and machine.

Advantage

- 1, LED light 3 color temperature adjustment, and dimming.
- 2, Memory power-off function, execute the settings before power-off.
- 3, Flip-over design makes maintenance more convenient.
- 4, Equipped with double-sided PIR infrared sensors, double-layer protection is safer.

Model	Power	Voltage	Wave length	Lamp type	Hold time	LED CCT	LED Lumen	Lamp size	Weight	Life span	Colour

Four-side upper room UV-C disinfection

Four-side upper room UV-C disinfection:to expand the disinfection range and increase the disinfection efficiency;four-side disinfection are all upper room class,UVC are all installed higher than 2.1m,applicable for occupied area.

Advantage

- 1, Four-side upper room UV-C disinfection,to increase the disinfection efficiency.
- 2, Four-side PIR sensors,to increase safety.
- 3, Four-side fan design,for more air flow.
- 4, Openable grill design,for easier maintenance.

L32

UV-C Safety Disinfection System

The L32 safety system has a set of safety logical sequence, the operator can turn on the disinfection lamp only according to the sequence. It can force the operator to conduct a safety inspection before disinfection in the room, close the door after checking and confirming there is nobody in the room, finally unlock admin lock with the administrator key to perform disinfection operations. During the disinfection, when there is someone opening the door & entering the room, the S2 will be turned off, disinfection will be stopped.

It is suitable for classrooms, restaurants, activity rooms, dormitories, offices, toilets and so on, any places needed to be disinfected.

First UL8802 certified UV-C safety system in China

Microbiology Laboratory

U.S. Invention Patent

UL Witness Laboratory

U.S. Appearance Patent

15 years of development **25,000** m² independent industrial park **600** employees

Shenzhen Guanke Technology Co., Ltd. was established in 2006. It is a national high-tech enterprise focusing on UV-C disinfection lamps and LED lamps. The company is located in Guangming District, Shenzhen. It has an independent industrial park of 25,000 square meters and more than 600 employees. The sales network has covered more than 70 countries and regions including North America, Europe, Japan and South Korea.

Guanke has always adhered to the concept that only product innovation can create value for customers. It invests more than 20 million in R&D every year and has a professional R&D technical team of more than 50 people. Guanke is the core enterprise of the Guangdong Intelligent Lighting Engineering Technology Research Center, and it also owns the UL Witness Laboratory, the Biology Laboratory and the National CNAS Laboratory. As one of the first enterprises in Shenzhen to implement intellectual property standards, Guanke has 11 US invention patents and 128 Chinese and European patents.

Guanke focuses on the production of safe UV-C disinfection products, and the independent research and development of 360° intelligent sensing technology is in the industry's leading position in terms of product safety. In terms of product production and quality control, Guanke has a complete production chain and an experienced management team, including dust-free production lines, precision injection molding workshops, CNC metal processing workshops, SMT patch workshops, power supply production workshops, product aging and assembly Workshops, etc., through the introduction of ISO9001 quality system, ISO14001 environmental body, BSCI social responsibility system, anti-terrorism safety management system and CNAS laboratory management system to improve product quality control. Crown Technology has built a production base covering an area of 50,000 square meters in Chengdu, which provides a strong guarantee for the company's rapid development.

In 2020, "Guanke Technology" won a well-known brand in Shenzhen. In the future development journey, all Guanke people will work hand in hand with partners such as global customers, suppliers and distributors to create a safe and intelligent UV-C disinfection industry chain.
